## 2 God is Sovereign

One of the fallacies of much egalitarian theology today is the belief that for two people to be “equal” they must do the same things. There is an assumption that you cannot have differentiation and order without also having inferiority and superiority of dignity or worth. But you can, and this is what we find in God’s Word!

## 2 God is Sovereign

All three persons of the Godhead share in the same divine nature, yet there is an asymmetry within the divine relationships. There is sameness and equality *alongside* functional or relational order and subordination. It is not a case of *either* equality *or* order, but *both* equality and sameness, *and* order and difference.
